

Accounting of time spent

Estimate Provided:

So all in all we estimated it would take around 30 hours to complete all the tasks for this assignment. Hours here refer to the sum of all the hours worked by each individual.

Task	Assigned To	Estimated Hours
File Parsing	Akhil	4
CLI UI	Bryan	6
Editing Logic	Sierra	6
Input Validation	Hannah	3
Test Cases	Nileet	4
Documentation	Team	3
Integration	Team	4
Total Time		30 Hours

Actual time spent:

The actual time that our whole team spent on the whole project took us around **35 hours**. It's a little more than the time that we had estimated because while we were testing we found a lot of bugs and edge cases that took additional time to fix. We have mentioned the same in the notes of the testing document.
